

Certificate Status Sheet

Current registrations, licences and certification progress.

PLACEHOLDER — replace with the final document before launch

This file exists so the Resources page links resolve during review.
It is not a buyer-facing document.

To produce the real version, take the corresponding page content from the website (already written) and lay it out with your logo, real photographs, and the operational figures confirmed by the Beni team.

Priority order for producing these:

1. Company Profile — the first thing a buyer opens
2. Product Specification — the document that gets forwarded internally
3. Certificate Status Sheet — answers the question buyers ask first
4. Everything else
